

CLEANING INSTRUCTIONS

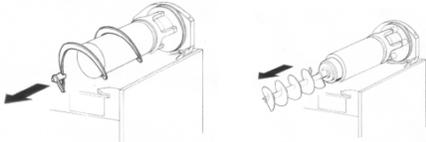

1. Empty bowls of any product.
2. Put motors in the off position.
3. Rinse with water

4. Lift the bowl up slightly from the front and off the fastening hooks.
5. Slide the bowl forward.

6. Slide off the outer spiral and inner auger

7. Remove the large white bowl gasket *and* the suction cup behind the auger.
8. Wash the machine with soap and water below where the bowl sat and where the gasket was.
9. Take the handle off and take out the spigot piston.
10. Wash the bowl gasket, suction cup, handle, & piston by hand, not in the dishwasher.
11. Lubricate the piston as seen in the provided picture.
12. Put back the bowl gasket; make sure it is seated properly on the machine.

DO NOT LUBRICATE THE BOWL GASKET

13. Lubricate the back of the suction cup and replace it snugly. Replace the inner auger blade and outer spiral.

Or lube the cup of the magnetic auger, as shown in picture

14. Replace the bowl and make sure it is snugly locked in.
15. Before putting any product in the bowl, pour in at least a quart of water to see if there are any leaks.

Make sure to drain all the water.

Lube Points (only lube these areas)

	<h3>Suction Cup</h3>
	<h3>Handle and piston</h3>
	<h3>Outer Spiral</h3>
	<h3>Magnetic Auger</h3>
	<h3>lubricant</h3>

If you do not have a suction cup, instead you'll have a magnetic auger. See picture above. Put a generous amount of lube inside the magnetic cup of the magnetic auger

Operating Instructions

1. "A" Main Power button (DO NOT turn machine off, unless a Steve's Frozen Chillers representative instructs you to do so).
2. Each Bowl is controlled by the "B" button under it. UP is DEFROST, DOWN is FREEZE and in the MIDDLE is OFF. Before the store closes put the "B" Button to UP on both sides.
3. At the beginning of your shift make sure the "B" buttons are in the down position to freeze.
4. The dial "D" controls the temperature when the machine is in Defrost mode
5. The "E" button controls the lights on top of the bowls.
